Software Engineer, Android
Financial Software & Systems (P) Limited (FSS)

08/2023 - Present   *Chennai, India*

Fintech Company

Achievements/Tasks
- In Android, I collaborated with software development and testing team members to design and develop robust solutions, meeting client requirements for functionality, scalability, and performance.
- Developed robust, scalable, modular and API-centric infrastructures. Designing and developing apps for the Android ecosystem.

SKILLS

Android · Flutter · HTML · CSS · Bootstrap · Angular · Java Script · Java · SQLite · C · GIT

PROJECT NAME

Purulia Tourism (06/2021)
- During my BCA course, I had the opportunity to craft a captivating tourism website utilizing the power of HTML, CSS, PHP, and JavaScript.
- Within that website, you can seamlessly explore and reserve rental houses while immersing yourself in captivating visuals showcasing picturesque tourist destinations.

eMart App (05/2023 - 07/2023)
- This is an e-commerce app developed with Flutter and Firebase, offering a wide range of products including Furniture, Women's and Men's clothing, as well as mobile devices.
